## Acknowledgements

This publication, the Water Safety Plan Compendium for small-scale water supply systems, would not have been possible without the financial support of the German Foundation for the Environment, DBU (Deutsche Bundesstiftung Umwelt). Therefore, special thanks to the DBU who provided financial support for the development of this WSP Compendium.

We would like to thank the children and staff of the schools in the Bulgarian villages, Hrishteni and Kaloyanovets of the region Stara Zagora, and the villages Pravets, Razliv and Vidrare of the region Pravets, for their support, their patience and willingness to participate in this project. They were the first users and testers of the provided WSP materials.

We would like to express our sincere thanks to Dr Andrea Rechenburg (Institute for Hygiene and Public Health) and Mr Cock Mudde (Project Manager, Vitens) for their valuable comments on the content of several modules.

In particular, we would like to thank Mandilyn Beck, Intern for WECF's Chemical and Health Department, who made the grammar corrections of the texts.

They all played a very important role in the achievements of this publication.
